PROFESSIONAL SUMMARY

Final-year B.Tech Computer Science student targeting AI Quality Engineer and test automation roles. Built full-stack and AI-powered systems using Python, REST APIs, SQL and PostgreSQL, and developing a Retrieval-Augmented Generation (RAG) copilot. Strong in object-oriented programming, Git/GitHub workflows, and analytical problem solving, with a keen interest in evaluating non-deterministic AI outputs, API validation and AI safety.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, SQL
Programming Concepts: Object-Oriented Programming (OOP), REST APIs
Backend & Databases: Spring Boot, Node.js, Express, FastAPI, PostgreSQL, Prisma ORM
AI / ML: Generative AI, LLMs, Retrieval-Augmented Generation (RAG), prompt/context compression, scikit-learn, demand forecasting
Frontend: React JS, HTML, CSS
Tools & Cloud: Git, GitHub, Linux, Microsoft Azure (AZ-900)
Security: Cybersecurity fundamentals

PROJECTS

RAG-Mate: Query-Adaptive RAG Copilot, *Python, LLMs, RAG* 2026 – Present

- Developing a query-adaptive Retrieval-Augmented Generation copilot as a final-year team project, based on the LiteRAG framework (Journal of Manufacturing Systems, 2026).
- Integrating LongLLMLingua prompt compression to reduce LLM context length while preserving answer-relevant information.

StockPilot: Warehouse Management System, *React, Node.js, Express, PostgreSQL, Prisma, Python (FastAPI, scikit-learn)*

- Developed a full-stack WMS covering inventory, receiving, putaway, picking, packing, shipping, returns, orders and rack management using React, Node.js/Express, Prisma and PostgreSQL.
- Integrated an AI-powered product classification engine that generates handling, hazard, risk, storage-condition and stackability attributes to support safe storage decisions.
- Implemented SKU-level demand forecasting and replenishment recommendations with scikit-learn, using historical order trends, inventory levels, safety stock and supplier lead time to identify stockout risks.

EDGE Event Website, *React JS, Git, GitHub* February 2025

- Coordinated development and contributed to frontend and backend implementation of the official website for EDGE, the flagship event of ACM Student Chapter FISAT.

EDUCATION

Federal Institute of Science and Technology (FISAT), B.Tech, CSE 2023 – 2027
Angamaly, Kerala | Current CGPA: 7.96

C.K.M.N.S.S. Senior Secondary School, Higher Secondary (Class 12) 2022 – 2023
Chalakudy, Thrissur | Score: 92.6%

CERTIFICATIONS

Microsoft Azure Fundamentals (AZ-900), Microsoft | Foundations of Cybersecurity, Google
Career Essentials in Software Development, Microsoft and LinkedIn
Artificial Intelligence Fundamentals | Generative AI in Action

POSITIONS OF RESPONSIBILITY

Learning Coordinator, TinkerHub 2026 – Present

- Plan and deliver campus learning initiatives such as Study Jams, track participation and work with campus leadership to improve learning outcomes.

Tech Team Coordinator, ACM FISAT, Angamaly 2025

- Led a team of 10+ developers to design and deploy the official club website using React JS.
- Streamlined the development workflow with Git and GitHub version control, reducing integration errors by 20%.
- Conducted a Capture The Flag (CTF) cybersecurity tournament under the flagship event EDGE 5.0.

HACKATHONS

Make-A-Ton 7.0, National-level hackathon by CITTIC and MLH, CUSAT, Kochi October 2024

INTERESTS

AI quality and evaluation, backend development, cybersecurity, UI/UX design, building a home lab, touch typing
